Kirti Yadav

SENIOR FULL STACK AI ENGINEER

+91-6266558859 ◇ yadavkirti7745@gmail.com ◇ kirtiyadav.in ◇ LinkedIn

PROFESSIONAL SUMMARY

Full Stack AI Engineer with 3+ years of experience building and delivering production web products across **React.js, TypeScript, Node.js, Express.js, MongoDB, REST APIs, AWS, and AI integrations**. Experienced in taking AI-powered product features from requirements and technical design through frontend implementation, backend integration, deployment, optimization, and production delivery. Built and shipped AI hiring workflows, realtime applications, complex role-based platforms, and production experiences serving **175K+ users**.

TECHNICAL SKILLS

Full Stack:	React.js • TypeScript • JavaScript • Next.js • Node.js • Express.js • REST APIs • Redux Toolkit / Thunk • React Query • Material UI • Tailwind CSS
AI / ML:	OpenAI APIs • OpenAI Realtime • AI Integration • Prompt Engineering • AI Document Processing • CV / Job-Spec Workflows • Semantic Matching • LLM Workflows • Streaming AI
Backend & APIs:	Node.js • Express.js • REST APIs • WebSockets • WebRTC • Authentication • JWT • RBAC • API Integration • Asynchronous Workflows • Third-Party Integrations
Data & Cloud:	MongoDB • Mongoose • SQL • AWS • S3 • SQS • Lambda • CloudFront • RDS • Elastic Beanstalk • MediaConvert • Route 53
DevOps & Production:	Git • CI/CD • Docker • Cloud Deployment • Production Debugging • Performance Optimization • Core Web Vitals • SEO • Open Graph

PROFESSIONAL EXPERIENCE

AI Product & Senior Full Stack AI Engineer — Crayon Technologies Pvt. Ltd.
Remote • May 2025 – August 2026

Worked across full-stack product engineering, AI integrations, frontend architecture, backend/API integration, realtime experiences, cloud deployment, performance optimization, and production delivery.

Project: Crayon.jobs — All-in-one Recruitment Platform

- **Owned end-to-end delivery** of major product features for a production recruitment platform serving **175K+ users**, translating product requirements into technical approaches, implementation, integration, optimization, and production releases.
- Built and integrated the platform's AI product suite including conversational workflows, **Reggie** CV/profile generation, **Jerry** job-spec generation, AI search, AI ATS workflows, CV/job-spec processing, semantic candidate-job matching, and AI interview experiences.
- Worked across frontend and backend AI workflows, integrating **Node.js/Express services, REST APIs, OpenAI APIs, asynchronous processing, and database-backed application flows** with React and TypeScript interfaces.
- Engineered a realtime AI video interview using **OpenAI Realtime and WebRTC**; combined screen recording, candidate audio, and AI audio in a browser canvas, uploaded video in chunks, and integrated backend media processing and streaming playback.
- Implemented complex role-based workflows across **5–6 user roles**, covering authentication, authorization, API orchestration, application state, dashboards, and reusable frontend components.
- Established SEO and performance foundations from scratch, including React Helmet, Open Graph metadata, sitemap, robots.txt, Core Web Vitals, responsive optimization, and production UX improvements across desktop and mobile.

Project: The Bridge — Privacy-first AI Reflection Platform

- **Built the product frontend from scratch to production**, owning architecture, component structure, API integration, responsive UX, implementation, optimization, and delivery from the initial product brief.
- Implemented realtime streamed AI conversations and reflection workflows, integrating streaming AI responses with the frontend and supporting the product's time-based content and user-state experiences.
- Built a **fully configurable admin platform** for managing product content, configurations, and user-facing experiences dynamically, reducing the need for code changes for routine product updates.
- Integrated backend services supporting the platform's **Collective Pulse / Insights** experience and translated aggregate AI-generated analysis into privacy-conscious user interfaces.
- Worked with the serverless product architecture and deployment ecosystem including **AWS Lambda, API Gateway, DynamoDB, EventBridge, S3, KMS, SES, Route 53, and CloudFormation/SAM**, gaining hands-on experience across production cloud delivery.
- Delivered a production-ready experience with strong **SEO, responsiveness, Core Web Vitals, performance, accessibility, and cross-device UX**.

Software Developer — Brain Inventory
Hybrid • June 2024 – May 2025 **Project: Waypoint — AI-Powered Travel Planner**

- Developed the complete frontend experience for an AI-powered travel planning platform, enabling users to plan international trips based on journey preferences, travel duration, countries, and cities.
- Built responsive and reusable interfaces using **React.js, JavaScript, Redux, and Material UI**, implementing complex trip-planning workflows and managing application state across multiple user selections.
- Integrated travel and flight APIs to present airline options, routes, stops, airports, and flight details, enabling users to compare options and proceed with flight bookings.

Project: Loyyal — Token Studio

- Developed frontend interfaces for a blockchain-powered asset tokenization platform, enabling enterprises to create and manage tokenized representations of real-world assets.
- Implemented responsive UI workflows and blockchain wallet connectivity for secure interaction with tokenized assets.

EDUCATION

Bachelor of Technology in Computer Science, RGPV University, Indore 2019 – 2023
CGPA: **8.9/10**

CORE STRENGTHS

Full-stack product engineering • AI product engineering • Application architecture • Backend/API integration • Realtime systems • Cloud & deployment • AI workflows • Performance optimization • Production reliability • Technical ownership • End-to-end feature delivery
